# **Zheng Huang**

Phone: 434-328-0876 · Email: zh4zn@virginia.edu · Website

#### Education

#### University of Virginia

Aug 2019 - Dec 2021

Master of Computer Science, major GPA: 3.95/4.00

Charlottesville, VA, United States

• Coursework: Design and Analysis of Algorithms, Machine Learning, Vision&Language, Graph Mining, Operating System

#### **University of British Columbia**

June 2018 - August 2018

UBC Visiting Student, Department of Electrical and Computer Engineering

Vancouver, BC, Canada

Hebei University of Technology

Sept 2015 - June 2019

Bachelor of Computer Science, major GPA: 87/100

Tianjin, China

## **Programming**

- Programming in Python/Java/C++/C/R/Javascript/HTML/CSS/SQL/ MATLAB
- Skillful in PyTorch/TensorFlow/Scikit-learn/Latex

# **Research Experience**

## **Empowering Next POI Recommendation with Multi-Relational Modeling**

Sep 2020 - Jul 2021

Research Assistant, advised by Professor Jundong Li

- Studied on Points of Interests (POI) recommendation by capturing the influence of multiple relations
- Utilized multiple Graph Convolutional Networks (GCNs) with Self-Attention mechanism to capture multiple user-user social relations (family or colleague) and user-location check-in relations
- Adopted coupled Recurrent Neural Networks (RNNs) to capture the mutual influence between users and POIs over time
- Conducted in-depth research on recommender system, sequential recommendation and Graph Convolutional Networks

## Assessing the Causal Impact of COVID-19 Related Policies on Outbreak Dynamics

Sep 2020 - Mar 2021

Research Assistant, advised by Professor Jundong Li

- Studied on the causal effect of different policies in reducing the spread of COVID-19 in the US
- Worked on a team and developed a neural network framework (GCNs&RNNs) based on time-varying observation data to control the influence of confounders, and integrated data from different data sources
- Investigated the problem of causal inference and COVID-19 observational social network data

#### **Identify Human-brand Co-location Network**

May 2020 - Jan 2021

Research Assistant, advised by Professor Natasha Zhang Foutz

- Studied on identifying broad human and brand co-location networks to advise personalized recommendation
- Preprocessed large scale location GPS data and decorated POIs for check-in data in a distributed environment with PySpark
- Investigated the application of distributed computing and clustering algorithms

# **Project Experience**

# Enrich Sequence to Sequence Video to Text Captioning with Action Recognition

Sep 2020 - Dec 2020

- Proposed a novel model, S2VTACT, to capture action features from video skeleton graphs with spatial-temporal GCN
- Utilized a stack of 2 recurrent units (GRU) encoders and decoders to learn video captioning with injected action features
- Investigated video captioning and applications of natural language processing (NLP)

#### **Publication**

- Zheng Huang, Jing Ma, Natasha Zhang Foutz and Jundong Li, "Empowering Next POI Recommendation with Multi-Relational Modeling", Submitted
- Jing Ma, Yushun Dong, **Zheng Huang**, Daniel Mietchen and Jundong Li, "Assessing the Causal Impact of COVID-19 Related Policies on Outbreak Dynamics: A Case Study in the US", WWW 2022, Arxiv

#### **Others**

• Awards: Top Academic Fellowship (2016, 2017, 2018)

• External Reviewer: PAKDD, WSDM

• Interests: Guitar, Piano, Driving
